HEAD PRESSURE CONTROLS

ICM Head Pressure Controls operate as temperature-sensitive motor fan speed controls. Head pressure is regulated during low ambient conditions by varying the amount of airflow through the condenser. This helps ensure sufficient pressure across the expansion valve, preventing costly downtime and/or loss of valuable perishable goods.

SERIES 130 definite purpose contactors

GE announces an exciting update of their definite purpose contactor line. Series 453 models will now be available to complement their Series 353 models. GE's new model 453 25-40 amp 3 pole contactors feature several significant innovations, including "finger safe" design and a visual indicator showing whether the contactor is energized. The model 453 25-40 amp 3 pole models also have been designed to accommodate IEC style auxiliaries.

Dielectric Unions - FIPxFIP

WATTS REGULATOR

WATTS

Series 3006 Dielectric Unions are used in commercial and residential applications to prevent accelerated corrosion and deterioration in the piping system due to galvanic and stray current. It is installed between pipes made from dissimilar metals, and features a female iron pipe thread to female iron pipe thread (black) connection. It consists of a union nut, two tailpieces, and a gasket that separates the tailpieces to prevent an electric current from occurring. Series 3006 is ideal in applications such as hot water storage tanks, water and air conditioners, processing tanks, steam, gas, and water piping.

HONEYWELL, INC.

24 Vac Dual Standing Pilot Gas Valve

24 Vac Dual Standing Pilot Gas Valve with 1/2 in. x 1/2 in. inlet\outlet, standard opening and 3.5 in. wc pressure regulator setting. Combination gas controls for use in 24 Vac, gas-fired, standing pilot appliances with capacities from 20 to 200 cfh. Controls include manual valve, two automatic operators, servo pressure regulator and pilot adjustment. Provide two automatic valves. Solenoid-operated first automatic valve opens on thermostat call for heat; closes when call for heat ends. Diaphragm-operated second automatic valve opens under control of regulator; closes if gas or power supply is interrupted. Meet codes requiring dual safety shutoff.

Intermittent Hot Surface Pilot Ignition

The SmartValve™ System Controls provide easy field replacement of a wide range of SV9500, SV9501, SV9502 and SV9602 SmartValve™ System models. Gas appliance manufacturers use these models in many types of gas fired heating appliances including central furnaces, residential boilers, rooftop furnaces, commercial cooking appliances, and unit heaters. These controls provide intermittent pilot gas ignition sequencing, pilot flame sensing, and both pilot and main gas control functions in a single control. They are directly compatible with the Q3450 or Q3480 Intermittent Pilot burners used with the original controls on the appliance. Standard opening and 3.5 in. wc pressure regulator setting.

Wall mounted (NDIR) Carbon Dioxide Sensor

HONEYWELL, INC.

The Carbon Dioxide (CO2) Sensors and Controllers are stand-alone carbon dioxide (CO2) sensors for use in determining ventilation necessity with HVAC controllers. The sensor measures the CO2 concentration in the ventilated space or duct. The sensors are used in ventilation and air conditioning systems to control the amount of fresh outdoor air supplied to maintain acceptable levels of CO2 in the space.

Flex Duct Cutter

MALCO PRODUCTS INC.

Malco

Built-in wire cutter lets you finish the job you started with just one tool! Double edged blade cleanly pierces through outer skin and insulation. Cuts from either direction around entire circumference of duct. Fine honed blade is long lasting stainless steel. Wire cutter cuts hardened wire rib coil. Compound leverage, for easy wire cutting. Comfortable, non-slip vinyl gripped handles.

Flex Duct Tool

MALCO PRODUCTS INC.

Malco

The versatile, new FDC3 Flex Duct Tool from Malco is actually three tools in one! The finely honed double-edged knife blade cleanly pierces through the outer skin, insulation and liner construction of flexible round duct and cuts in either direction. A thumb-operated latch opens the tool's compound-leverage handles and the jaws of a built-in wire cutter to easily sever the exposed wire rib coil of duct liner. Use the tool's tie-tensioning mechanism to install a nylon tie strap and secure the flex duct take-off collar. With the handles of the FDC3 in the open position, a nylon tie can be threaded through the mechanism and then tightened by gently pumping the tool's handles. Use the wire cutter to trim excess tie strap tail. Trimming and installing flexible round duct is now as easy as one-two-three with Malco's new FDC3 multi-purpose Flex Duct Tool
